MORGAN WRITES FAVORABLY.

Flying Machine to be an Attraction—
Twenty-five Kilometer Race—Ormond
Hotel Has Large Bookings.

Everything points to one of the most successful automobile meets ever held in the country on the Ormond-Daytona beach, beginning Monday, Jan. 22, and lasting the entire week.

The fastest racing cars in the world are coming and many of them are being built expressly for the occasion, to smash all previous records.

Interest is becoming intense and in many of the big centers dozens of cars have been shipped weeks in advance, in order that they might arrive here in time for the event.

Boston is sending many machines to the scene and the Clyde Line has more looked than they can handle, until after the races. The low rate on machines, as established by the Clyde Steamship Company and the Florida East Coast Railway is the cause of many pleasure seekers bringing their cars south, in addition to the racing machines.

Already has the Hotel Ormond, under the management of Anderson & Price, bookings that will take up every bit of room in the big hotel, and J. D. Price, one of the managers, says that he is in a quandary as to what to do with the crowds.

Mr. Lamont, of the Lamont Livery, at Ormond, found it necessary to bring his cars two weeks ago, in order to get them here at all.

Senator W. J. Morgan, who is proving a promoter of great ability, in a letter

CITY ELECTION NEXT MONTH.

Mayor Issues Call for Election on February 14th.—Warm Contest is Looked For.—Many Candidates.

Mayor Smith has issued his proclamation calling for a regular city election, to take place on Wednesday, February 14, at which time a mayor, tax collector, treasurer, clerk, assessor, three school trustees, and five aldermen, will be elected.

Not in many years, has so much interest been manifested in a coming election, as in the one that will be held next month. Already, candidates and their friends are out hustling for votes, and telling their respective side of the case.

It is to be hoped that the election will be devoid of bitter feeling; let each man run on his merits, and if there is nothing good you can say about any of the candidates, don't run them down in the

least.

The majority of the voters in Daytona, know which gentleman is the best suited for public office, and they are going to vote according to their own desires.

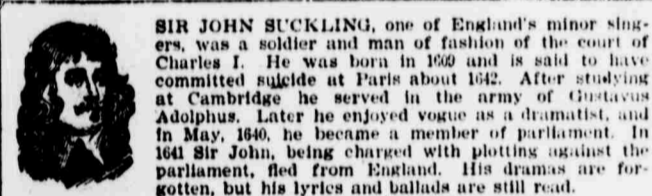

The citizens of the town want to have a clean city election, devoid of tirade and abuse, and it is to be hoped that all candidates and their workers will follow this policy.

REGARDING THE CANDIDATES.

Mayor Smith, some time ago, told The Daily News that he would be a candidate for reelection. He says that he has certain improvements that he wants to see go into effect before he retires (continued on last page)

A Poem for Today

THE BRIDE
From "A Ballad Upon a Wedding"
By Sir John Suckling

HER finger was so small the ring
Would not stay on which they did bring—
It was too wide a peck,
And, to say truth, for out it must,
It looked like the great collar—just—
About our young colt's neck.

Her feet beneath her petticoat
Like little mice stole in and out
As if they feared the light.
But, oh, she dances such a way!
No sun upon an Easter day
Is half so fine a sight.

Her cheeks so rare a white was on;
No daisy makes comparison.
Who sees them is undone.
For streaks of red were mingled there
Such as are on a Catharine pear.
The side that's next the sun.

Her lips were red, and one was thin;
Compared to that was next her chin—
Some bee had stung it newly.
But, Dick, her eyes so guard her face
I durst no more upon them gaze
Than on the sun in July.

Her mouth so small, when she does speak
Thou'dst swear her teeth her words did break.
That they might passage get,
But she so handled still the matter
They came as good as ours or better
And are not spent a whit.

MOTORBOAT RACE HELD.

Collins' Craft Carries Off First Honors
in Fifteen-Mile Contest.—Birchwood Boat Second Place.

Crowds lined the dock of the Halifax River Yacht Club, and the South Bridge, yesterday afternoon to witness the motorboat contest, in which the Collins, Thompson and Birchwood boats were the contestants. The Collins' boat, which has a 25-horsepower engine, simply flew around the course and made the fifteen miles in forty-one minutes, carrying off first honors.

The Birchwood craft came in for second place, and made the distance in fifty-four minutes. The Thompson boat broke down, after it made two of the rounds.

The judges of the race were J. G. Brown, N. A. Lewis and G. W. Blymer.

dated New York, Dec. 29th, to J. F. Hathaway, says in part as follows:

"I have arranged that the airplane man will go to Ormond and give one or two flights during automobile week, as Mr. Anderson seemed desirous of engaging the man as an additional attraction for automobile week, and it is quite possible that he will go to Cuba as well.

At the present time I am predicting that we will not only have the fastest cars in the world but the greatest number of cars that has ever gathered together on one spot on this earth. I expect about twenty-five highspeed cars on the beach, which will be ample to break all records the record books now have.

I am greatly interested in the Times-Union pretty girl voting contest, and I wish that you would take special interest in it and see that Daytona sends in votes for some girl there. I believe that Ormond will take the matter up, and I am very desirous of seeing the Times-Union do well in the contest as they furnish the crown, etc."

Mr. Morgan says that it has been suggested to him by the New York Herald that a twenty-five kilometer race be held instead of the fifteen mile championship for the New York Herald trophy. He further says that he thinks it would be well to make the change and have the handsome trophy as first prize, and also that it would be well for the hotel proprietors of Daytona to get up a prize and in addition have the merchants contribute, and for the Seabreeze people to have one of their own.

A Long Sail.

Within a few days, Captain William Smith and F. D. Staples, boat builders of this port, will sail from here for Ormond, Fla., in a little 31-foot schooner, says a Portland, Me., dispatch to the Times-Union. The craft has a beam of eight feet, and draws only three feet of water.

The voyage is considered as extremely hazardous at this season of the year when fierce Northerly gales sweep the Atlantic coast with but scant warning of their approach. Old mariners in the big coastwise coal-carrying schooners do not look forward with pleasurable anticipation to rounding Cape Cod or Cape Hatteras during the winter months.

Captain Smith, however, is not at all disturbed by the ominous shakes of the head which come from those who know he is to start out in his little schooner. He expects to make the voyage in about one month from the time of leaving this port, and looks for the roughest weather between Portland and Long Island Sound.

The two boat builders plan to remain at and around Ormond until about the last of April, when they will return in their craft to Portland.

Night Policeman.

Mayor Smith has appointed W. E. Lastinger as night policeman, with Beach Street and Palmetto Avenue as his territory. The new officer began his duties yesterday. He goes on duty at 6 o'clock in the evening, and is relieved at 5 a. m.

Name Her.

The Daytona correspondent of the Times-Union, says:

"Thought takes form in action. The Daytona Daily News wisely suggests that a Daytona girl should crown the Speed King at the annual automobile meet, January 22-27. Why not? If it is beauty or brains or culture, or all that are required, Daytona from her galaxy of pretty girls can produce what is wanted. We are only waiting for some one to name her, and all Daytona, Seabreeze and Daytona Beach will work for the winning.

NO BIKES

ALLOWED.

No Paced Bicycle Contests Will Take Place on the Beach.—Walthour and McLean Anxious To Race.

It has been authoritatively announced that there will be no paced bicycle races during the Ormond-Daytona Beach automobile tournament this month. Hugh McLean, of Chelsea, Mass., and Bobby Walthour, of Atlanta, Ga., had approached the management with a view of contesting against each other in motor-paced races on the hard Florida beach, but "Senator" W. J. Morgan says there will be no cycle event of any kind during the Ormond-Daytona races.

"Ever since the death of Frank Croker there has been a great prejudice against allowing either bicycles or motor cycles on the Ormond-Daytona Beach," says Mr. Morgan, "and for that reason it has been decided to refuse the request of McLean and Walthour regarding the addition of one or more motor-paced bicycle races. They hoped to compete in a series of races from 10 to 100 miles, and would undoubtedly have made a lot of new records on the long, straight stretch of hard sand. Walthour, in particular, was very anxious for a try at the straightaway mile record, which he predicted could be placed at 0:45 by himself if he were able to have a big, high-powered racing automobile fitted with a wind shield. Walthour had figured that a wedge-shaped wind shield could be affixed at the back of a fast racing car, and by fitting his mount with a very high gear, that he could cover the mile in 0:45 or better. However, his theory cannot be tried out at Ormond-Daytona Beach next month."

Given Lecture.

Two strangers were brought before Mayor Smith this morning, on the charge of violating the bicycle light ordinance. They were given a lecture by the Mayor, and told if they were ever brought before him again on a similar charge that they would be fined.

Mr. and Mrs. G. J. Huffer, of Frost, Texas and Frank T. Hamilton, of Philadelphia, are recent arrivals at The Gables.

A Poem for Today

WHEN MY SHIP COMES IN
By Robert Jones Burdette

SOMEWHERE out on the blue seas sailing,
Where the winds dance and spin,
Beyond the reach of my eager hailing
Over the breakers' din,
Out where the dark storm clouds are lifting,
Out where the blinding fog is drifting,
Out where the treacherous sand is shifting,
My ship is coming in.

Oh, I have watched till my eyes were aching,
Day after weary day!
Oh, I have hoped till my heart was breaking,
While the long nights ebbed away!
Could I but know where the waves had tossed her,
Could I but know what storms had crossed her,
Could I but know where the winds had lost her
Out in the twilight gray!

But, though the storms her course have altered,
Surely the port she'll win;
Never my faith in my ship has faltered;
I know she is coming in.
For through the restless ways of her roaming,
Through the mad rush of the wild waves frowning,
Through the white crest of the billows combing,
My ship is coming in.

Breasting the tides where the gulls are flying,
Swiftly she's coming in;
Shallows and deeps and rocks defying,
Bravely she's coming in.
Precious the love she will bring to bless me,
Swoony the arms she will bring to caress me,
In the proud purple of kings she will dress me,
My ship that is coming in.

White in the sunshine her sails will be gleaming—
See, where my ship comes in!
At masthead and peak her colors streaming,
Proudly she's sailing in.
Love, hope and joy on her decks are cheering,
Music will welcome her glad appearing,
And my heart will sing at her stately nearing,
When my ship comes in.

Working Horn.
It is often the case that amateurs would like to make some use of hand-some horns, but from the rigid and ob-stinate nature of the material are un-able to do so. A simple process care-fully followed out would enable any one to make beautiful and useful ar-ticles. The inner part of the horn is scraped out, then it is thrown into wa-ter and boiled for an hour or so, when it becomes soft. It is then held in the flame of a wood or coal fire, being con-stantly turned. It should be kept in the fire for some time, care being taken that it does not burn, and is frequently moistened by being dipped in boiling water. The heat and steam will soften it to about the condition of moistened leather. It is therefore very soft and can be split lengthwise by a strong knife and pinchers. It can then be cut into thin layers by separating the sheets of which it is composed. By using pieces of between discs it can be made to take almost any form. When the article is complete it can be scraped smooth, then given a high polish.

Snakes.
Snakes have their usefulness in the world. They are the scavengers of swamps and marshes where other ani-mals of size are unable to penetrate to exist. It is in the tropics of course that serpents chiefly abound. At snakes are of tropical origin, but some species have spread into cooler lati-tudes. In very cold countries there are no snakes. Contrary to the popular belief, there are some snakes in Ire-land, but they are very rare. The smallest serpents in the world are the "worm snakes" of the tropics. They are about as big as fair sized earth worms. Some snakes lay eggs, while others bring forth their young alive. In the latter category are vipers, rat snakes and nearly all water snakes. Pythons incubate their eggs after lay-ing them.

The Way You Do It.
One reads that Darwin never under-
stood an equation, and the chances are
that Isaac Newton could not have pass-
ed any examination in literary or na-
tural subjects, with his idea that
poetry was ingenious nonsense and
statuary only stone dolls. Faraday
had no gift for mathematics, and it is
a mooted question if Napoleon Bonaparte
could have passed a college en-
trance examination in French. But it
was their ability to do some one thing
well that has turned the world upside
down at various times in its forward
march, not their inability to do badly
what all the world only does moderately
well. It makes little difference what
you do—the difference lies in the way
you do it. The business world is over-
stocked with poor people looking for
good positions, while good positions are
waiting for good people to fill them.

TERSELY TOLD LOCAL ITEMS...

BOAT WAS CAPSIZED

Robert Holmes Loses Everything in His Boat, and Narrowly Escapes a Watery Grave.—Sold Craft.

A cat-rigged boat called The Seven Pines, with Robert Holmes in command, came ashore opposite Ponce Park, Sunday evening in a heavy squall. The boat was capsized, and the clothing and every utensil belonging to the owner was washed into the ocean. The boat was en route from St. Augustine to Miami, and she was making an attempt to go into the Inlet, so as to take the inland route, when the squall struck her with violent force.

Mr. Holmes has decided to give up the trip and has disposed of the boat to Bert Pacetti, of Ponce Park, who will transform the craft into a launch.

Up to the time of reaching the inlet, Mr. Holmes reports having had a very pleasant time.

Board of Trade.

The Daytona Board of Trade is holding a meeting this afternoon. The principal matter to come up will be to consider the advisability of using booklets descriptive of Daytona.

Obituary.

The funeral services of Merton Elliott, whose death was mentioned in our columns yesterday, took place yesterday afternoon, at his request was laid to rest in Pinewood Cemetery. He had been a sufferer from tuberculosis three and a half years, and in his battle for life had been successively in Arizona, California, Honolulu, Colorado, North Carolina, the Adirondacks, and last winter in Winter Park, Fla. From his first entrance into Florida, clear to the end, he delighted in the country, and often expressed his great love for Florida. As he felt the end nearing he spoke again and again of his gladness that he was here, and could be laid to rest here.

His mother and sister, who have been with him throughout his entire sickness, will remain in Daytona through the winter, and may eventually make Florida their permanent home. His father, C. G. Elliott, C. E., is at the head of the Department of Land Drainage, in the Department of Agriculture, at Washington, and his duties take him away from home all the time, he being sent all over the country wherever there are difficult problems in reclamation of lands by drainage to be solved.

Parson Patterson, of Eau Gallie, has returned home, after spending a day or two in Daytona. He has just returned from North Carolina, where he attended the marriage of his sister.

Pathetic, Pungent, Pointed and Philosophical—People's Peculiarities Pleasantly and Practically Portrayed

TWO THIEVES ARE CAUGHT.

Many Articles Belonging to Merchants Found in Midway.—Held Over in Default of \$1,000 Bond.

George Davis and Will Thomas, two colored sneak thieves, were caught in Midway yesterday by Deputy Sheriff C. M. Kurtz, and two colored officers, Gad Taylor and William Sampson, who have been working on the case for some time. They were arraigned before Justice Cox, and held in \$1,000 bond to await the action of the Criminal Court.

These negroes have been operating in this vicinity for some time past, and it is probable that a large number of the robberies that have occurred can be traced to them.

In their room was found three pairs of shoes, two pairs of trousers, and three shirts, the property of Anthony Brothers, two pairs of shoes and two coats, the property of M. B. Aultman. In addition there was a Stetson hat, raglan overcoat and a pair of gold spectacles, which could not be identified.

On several occasions these negroes have visited the two stores above mentioned at times when the places were well crowded. One of the number would attract the attention of the clerk and the others get in their nefarious work.

While the officers were about to make the attack on the house, one of the number escaped and is still at large. All three are able bodied young negroes.

After the preliminary hearing, a telegram was received from Ocala, stating that Thomas is wanted there for jail breaking.

Davis, the other darkey in the toils, claims Jacksonville as his home.

Gilt Edge Propositions

New Years Dance.

The New Years dance given by the management of the Marlo Amusement Company was a success, and there were about thirty couples in attendance. Good music was furnished, and everyone present had a pleasant time. The next dance will take place on Thursday evening.

Oranges Plentiful.

Florida oranges are said to be very plentiful in the northern markets, and are bringing very fair prices. Last week over 32,000 boxes were received by New York buyers. The Indian River russets are arriving at eastern points in large quantities. Florida "Brights" bring from \$4 to \$4.50 per box.

Bamboo or Rattan Goods.

Large stock just in. Now is your chance for Christmas Goods.

**...Wanted...
 1,000 Reporters!**

The Daily News wants 1,000 reporters. No, this is not a joke. We really want them, and we won't be happy until we get them.

In other words, The Daily News wants every person, male and female, 18 years of age and over, in Daytona and its environs, to get on the staff of the paper. The Daily News wants every scrap of local news that is worth printing to appear in its columns. The best way to get it is to ask the people who know about the news to send it to the paper.

So if you know of anything that has happened, or is about to happen, tell the City Editor about it or write to him.

Let every man and woman, youth and maid in and around Daytona become a reporter The Daily News.

DAYTONA AND ITS ATTRACTIONS.

DAYTONA is situated upon the west bank of the Halifax River at its farthest expanse and midway between its source at Bolow Bay and its outlet at Mosquito Inlet. It is in latitude 29, seventy-four miles from St. Augustine and one mile from the Atlantic Ocean, and is acknowledged to be without a rival for beauty among the villages of the South. Its site is upon what is known as high hammock land that was crowned by nature with a most royal growth of majestic forest trees, and among these trees is the town of today, with its beautiful cottages and well-graded walks and streets. The result is that all along the wide avenues that intersect the town are lovely live and water oaks and hickories, many of them draped with graceful festoons of the gray Spanish moss, that overarch the street and walks, and among these are interspersed tall tropical palm-trees, glossy-leaved magnolias, fragrant bay and coral-berried holly, and many other varieties, while in many places the wild grape, the trumpet vine and the amplexoid climber and clinging among the branches forming shady bowers and adding grace and beauty.

The town lies parallel with the Halifax River, and extends for nearly two miles along the shore. The river is the delight of the angler as the yachtsman and forms one of the town's greatest attractions.

The main avenues last year parallel with or intersect the river at all 100 feet wide, except Beach street which is about sixty-five feet, but has a half-mile of open, beautiful water, abutting upon its eastern side, where the salt waves ebb and flow and along and across which comes the cooling invigorating and health-giving breezes from off the wide Atlantic, which temper and render the Halifax climate one of the most perfect in the world. Daytona has many miles of well-graded, macled and shelled roads and streets, rendering it the

Wheelman's Paradise and added to these, but a mile away are thirty miles of smooth, hard beach that affords an unrivalled course for long-distance cycling and driving of automobile racing. No town of equal size, North or South, numbers so many wheelmen, and cycling is a favorite pastime with the tourists summer and winter.

The Beautiful Cottages that have been erected during the past years and are being built are rendering Daytona as famous for its fine homes as for its beautiful river, trees and avenues, and they are adding yearly to its attractions.

Not the least of these attractions to those securing homes in the South and ranking second only to healthfulness and perfection of climate, is the fact that its population is chiefly composed of cultivated and intelligent people, accustomed to the refinements of home and social life. Added to these features are good churches, good public and private schools, stores, hotels, laundry, meat markets, novelty works, an opera house, electric light for street and house illumination, a good telephone system, ice factory, Lily Water Works, and hot and cold baths, etc., and everything else can be procured that is necessary to make life comfortable. An important feature in the healthfulness of this town is the

Water Supply which is derived from numerous flowing wells, of which there are probably 300 in the corporate limits. This flow is secured by boring wells to the depth of from 80 to 120 feet, passing through several strata of rock, and this depth assures purity from all surface contamination. The water is slightly impregnated with magnesium and iron, and holds sulphur in the shape of gas, which soon passes away.

The Population of Daytona proper is about 1,800. Added to this is a suburban population on main shore and peninsula of about 1,000 at Kingston, Blake, Old Seabreeze or Goodall, Seabreeze and Silver Beach which are properly a part of the town and population.

Daytona Beach lies one mile east of the town. It is approached by three good bridges over the river and well-graded avenues, and is the principal summer resort south of St. Augustine. It has more tourists during the summer than all other places south of that city combined, and is also becoming a favorite winter resort. The beach is wide, firm and smooth, by many considered the finest in the world, and the sunbathing is safe and excellent summer and winter. People who have tried Northern and Western summer resorts declare that there are none so perfect in comfort as Daytona beach.

Automobile Race Meet. The Florida East Coast Automobile Association conducts an annual race meet on the beach, which has now a universal reputation as the greatest automobile race course in the world. The Daytona-Ormond Beach is hard as macadam, and an ideal stretch of thirty or more miles without a break makes it the natural racing ground for America.

At low tide the beach is bare for 300 feet and neither carriage wheel, bicycle or pedestrian can make a hardly visible imprint on the smooth and well-packed sand. It is no uncommon sight to see sail-rigged bicycles speeding with the velocity of the wind before a stiff breeze along the smooth beach, thus affording the most exhilarating sport known to man. Besides these, miles of hard-shelled, palm-fringed boulevards bring the lovers of

the wheel and vehicles into direct touch with the mainland over the broad bridges which span the splendid Halifax River.

The beach from the sandy bluffs to the lowest point at oblique, measures about 500 feet, and the average depth of the surf measures about two feet. A continuous gentle swell rolls in from the ocean from one to two feet in depth under normal conditions, making the beach an attractive and absolutely safe place for sunbathing here the infant as well as the gray-haired veteran of many summers, can safely enjoy the luxury of a sea bath throughout the larger part of the year, while the strong and expert swimmer, an venture out further to test his strength and skill in battling with the inexhaustible powers of the mighty ocean.

The Peninsula lying between river and ocean is one half mile wide, and is being rapidly improved, and there are many fine cottages and several good hotels, an opera house, two ocean piers, beach aviation and a large casino.

A Remarkable Feature at Daytona has been the yearly improvement in the style and value of the buildings that are being erected or homes. Men of capital of the North and West have become awakened to its advantages for winter residences, and valuable lots are being purchased and costly houses, beautiful in design and finish, are being erected, and beautiful homes, the shades of wealth and culture are multiplying. Seabreeze (City Beautiful) and Goodall are settlements on the Ocean side of the peninsula across the Halifax River from Daytona.

At the foot of Ocean Boulevard, Seabreeze, a pier reaches 600 feet across the beach into the swelling surf of the ocean. This pier is a favorite resort of those who delight in the sport of fishing. The surf here abounds in trout, pompano, yellowtail, cavalle, whiting, drum, sheepshead and many other varieties of edible fish. During the fall season the famous sea bass affords royal sport, and it has been no uncommon occurrence to land a thousand pounds of this gamey fish in an afternoon, individuals of them ranging from fifteen to thirty-five pounds in weight. Not only does the ocean offer this splendid sport but the Halifax River, only half a mile back of the ocean, is equally famous for its fine fishing, and the varieties that abound in the ocean are present in the river.

Hunting and fishing good. Experienced guides and dogs may be had at reasonable prices.

High tide hours before or after low tide

Expected the Usual Results. At provincial theaters in France when opera is given it is not uncommon for untired tenors to submit themselves to the public judgment, which is usually hostile. One of these obscure songsters presented himself and sang the first act. He did not make a "hit." He retired to his dressing room, took off his makeup and was preparing to go home when the manager appeared. "What?" he cried. "You are not dressed for the second act, and the curtain is just going up! Thousand thunders!" "The second act?" said the tenor placidly. "I can't sing the second act. I don't know the second act. Whenever I sing I am always kicked out after the first!"

The Jury. Citizen—What possible excuse did you fellows have for acquitting that murderer? Jurymen—Insanity. Citizen—What? The whole twelve of you?

The art of being able to make good use of moderate abilities often confers more reputation than real merit.—Rochefoucauld.

Apparently a man cannot have an airship that is both safe and useful. But if a man can make two miles a minute, what more do we need? Given the ideal road and such a machine, what more could be desired? And it would be easier, safer and better to construct an ideal road between Boston and New York, to Philadelphia and to Chicago, than to wait for the airship. And this conclusion may come out of the trials on Daytona Beach.—Jacksonville Times-Union.

*Get your auto numbers of Petrepher. The new law requires that all machines be numbered. Stock on hand. If

City Election Next Month.

from office. Who will next month has not been decided, but it is a positive fact that he will have opposition. The names of S. H. Gove and James Rix have been prominently mentioned, but since the former accepted the superintendency of the Electric Light Plant, it bars him from holding a city position.

Henry Schmidt, J. A. Hendricks and J. D. Maley, are slated as being candidates on the aldermanic board for reelection. S. W. Carroll will also make the race for one of the chairs.

H. F. Douglass, who has held the position of tax collector for a long term of years, will be a candidate for reelection.

Frank T. Peck, is treasurer; Jay Wilkinson, clerk; C. M. Bingham, Jr., assessor; Rev. C. M. Bingham, Rev. B. F. Marsh and Geo. H. Ludwig, are three of the school trustees, and it is probable that their large list of friends will again persuade them to run for the office.

ABOUT THE VOTES.

At the last city election about 137 votes were cast, while it is the opinion of those who are posted that more than 200 are now qualified, of which nearly one-half are colored.
